SYSTEMS ENGINEER

Graduated from the Universidad Popular del Cesar, motivated and results-oriented, looking for a challenging position within a large organization as a software developer or in related positions in the technological area. He offered a solid foundation as a junior web developer, backed by academic and practical experience in the design, development and implementation of innovative and efficient solutions. Passionate about problem solving and continuous learning, with skills in agile methodologies to work as a team and adapt to dynamic environments.

KEY COMPETENCES

Experience in creating web applications with HTML, CSS, JavaScript, and frameworks such as React, Angular and Laravel.

Ability to address technical challenges with an analytical and creative approach.

Ability to work as a team and communicate ideas effectively.

PROFESSIONAL EXPERIENCE

Freelance

Dec 2021 - Present

Freelance Software Developer

As a freelance software developer, I have worked on short projects using tools such as AngularJS, .NET Framework, Python, MySQL, Jira and Bitbucket. During these experiences, I have demonstrated the ability to work autonomously, meet established deadlines, and adapt to different technologies and project requirements.

DevZeros S.A.S

feb 2023 - Dec 2023

Full-Stack Web Developer

I participated in the development of academic task management within the DevZeros School platform using PHP, Laravel, MySQL and Git, collaborating closely with the team to implement efficient solutions, solve technical problems and improve the user experience, acquiring practical skills in design and development of web applications under agile methodologies.
